

HOW WEBOOST CELL SIGNAL BOOSTERS WORK:

1 OUTSIDE ANTENNA

Receives cell signal from the tower and transmits it to the booster

2 BOOSTER

Amplifies cell signal and transfers it to the inside antenna

3 INSIDE ANTENNA

Broadcasts the improved cell signal throughout your workspace

WE'RE RAISING THE BAR ON CELL SIGNAL COVERAGE.

weBoost is the leading manufacturer of commercial-grade cell signal boosters for small businesses. From the office to the road to the warehouse, our boosters are designed to provide your business with the most powerful cell signal possible.

All weBoost cell signal boosters share these great features:

- Boost cell signals, including 5G, to stop dropped calls and improve data speeds
- Support all cell phones and devices on all US carriers
- Simultaneously boost signal for multiple users
