

Securitron® DPA Door Prop Alarm

The DPA complements door position/door state detection with timed logic and relays that provide escalating alerts when a door is held, propped or unsecure after a defined time period.

This unit promotes safety and loss prevention at ancillary exits for healthcare, commercial and retail facilities.

Features

Standard Features

- Multi-functional control timer provides relay action for alarms and alerts
- Monitors whether a door remains open after a defined time frame
- Includes three SPDT outputs providing local and remote signaling
- Digital time settings from 30 to 240 seconds
- Detects attempts to tamper with lock or door status
- Multiple time ranges for escalating alerts
- Bypass mode for valid access/egress needs
- Comes with Piezo sounder and LED
- MagnaCare® lifetime replacement, no fault, no questions asked warranty

Specifications

Electrical

- Max draw 100 mA at 12 VDC
Max draw 50 mA at 24 VDC
- 5A SPDT Relays

Operating Temperature

- +32 to +120F [0 to +49C]

Shipping Weight

- 2.05 lbs [0.93kg]
