

**now seamless security +
connected home automation
go smartly hand in hand**

Secure the best peace of mind & convenience with a smart Napco Security System now integrated to the maxx with Control4, at your fingertips, home or away.

Monitor, manage and control your security system and more, wherever you are. Sure, you can turn your advanced security system, perimeter or interior, on or off, from any Control4® touch screen or station, at home or from a smartphone or tablet through 4Sight®, but smarter customized protection's just the beginning.

With your Napco Security System reporting any and all activity in your home directly into your Control4 System you'll also know status of what's happening and where, anytime. Stay in the know: Get updates of comings and goings, when it's armed or disarmed; know where motion is detected, keep an eye out on certain areas, people and more.

Your smart home's suddenly smarter, plugged in with your Napco Security System, and that means you're smarter.

- + Know to relock your door, since your son's no longer home, or the cleaners just left
- + Get proof that your special delivery or repairman really arrived
- + Automatically turn the lights off and the thermostat down, and save energy, since everyone's out
- + In an alarm emergency, know who's there, who came to the rescue; how and where it started

napco. the smarter home security you deserve
