

The Illuminated Switch your LEDs have been waiting for!

Soft, Steady Illumination with Modern Appeal

Leviton's new line of LED Illuminated Switches are the only illuminated switches engineered for optimal performance with all bulb types, including LEDs and CFLs, without requiring a neutral. Our patent pending technology is designed to eliminate flickering of the switch and other performance issues that can occur when lighted switches are paired with LED and CFL loads. Featuring updated white LED illumination, the switch remains illuminated when in the OFF position, making it easy to locate in a dark room or hallway. LED Illuminated Switches are available in Decora® or Toggle models to suit any décor.

Applications

Leviton's exclusive LED Illuminated Switches coordinate seamlessly with other Leviton residential devices. Its white LED glow offers the benefit of a locator light, making it easy to find in a dark room, while still being gentle enough for everyday living space. This switch delivers the ideal solution for bathrooms, bedrooms, hallways, staircases, basements, laundry/utility rooms and garages.

Features and Benefits

- Designed to work with LED, CFL and incandescent bulbs
- Switch remains illuminated in the OFF position, so it is easy to locate in a dark room
- White LED light inside the switch provides a refreshed and modern appearance
- No neutral wire required
- Replaces any standard switch
- Decora model compatible with Decora wallplates and Decora Plus™ screwless wallplates

Wallplate sold separately.
