

Leviton Load Center

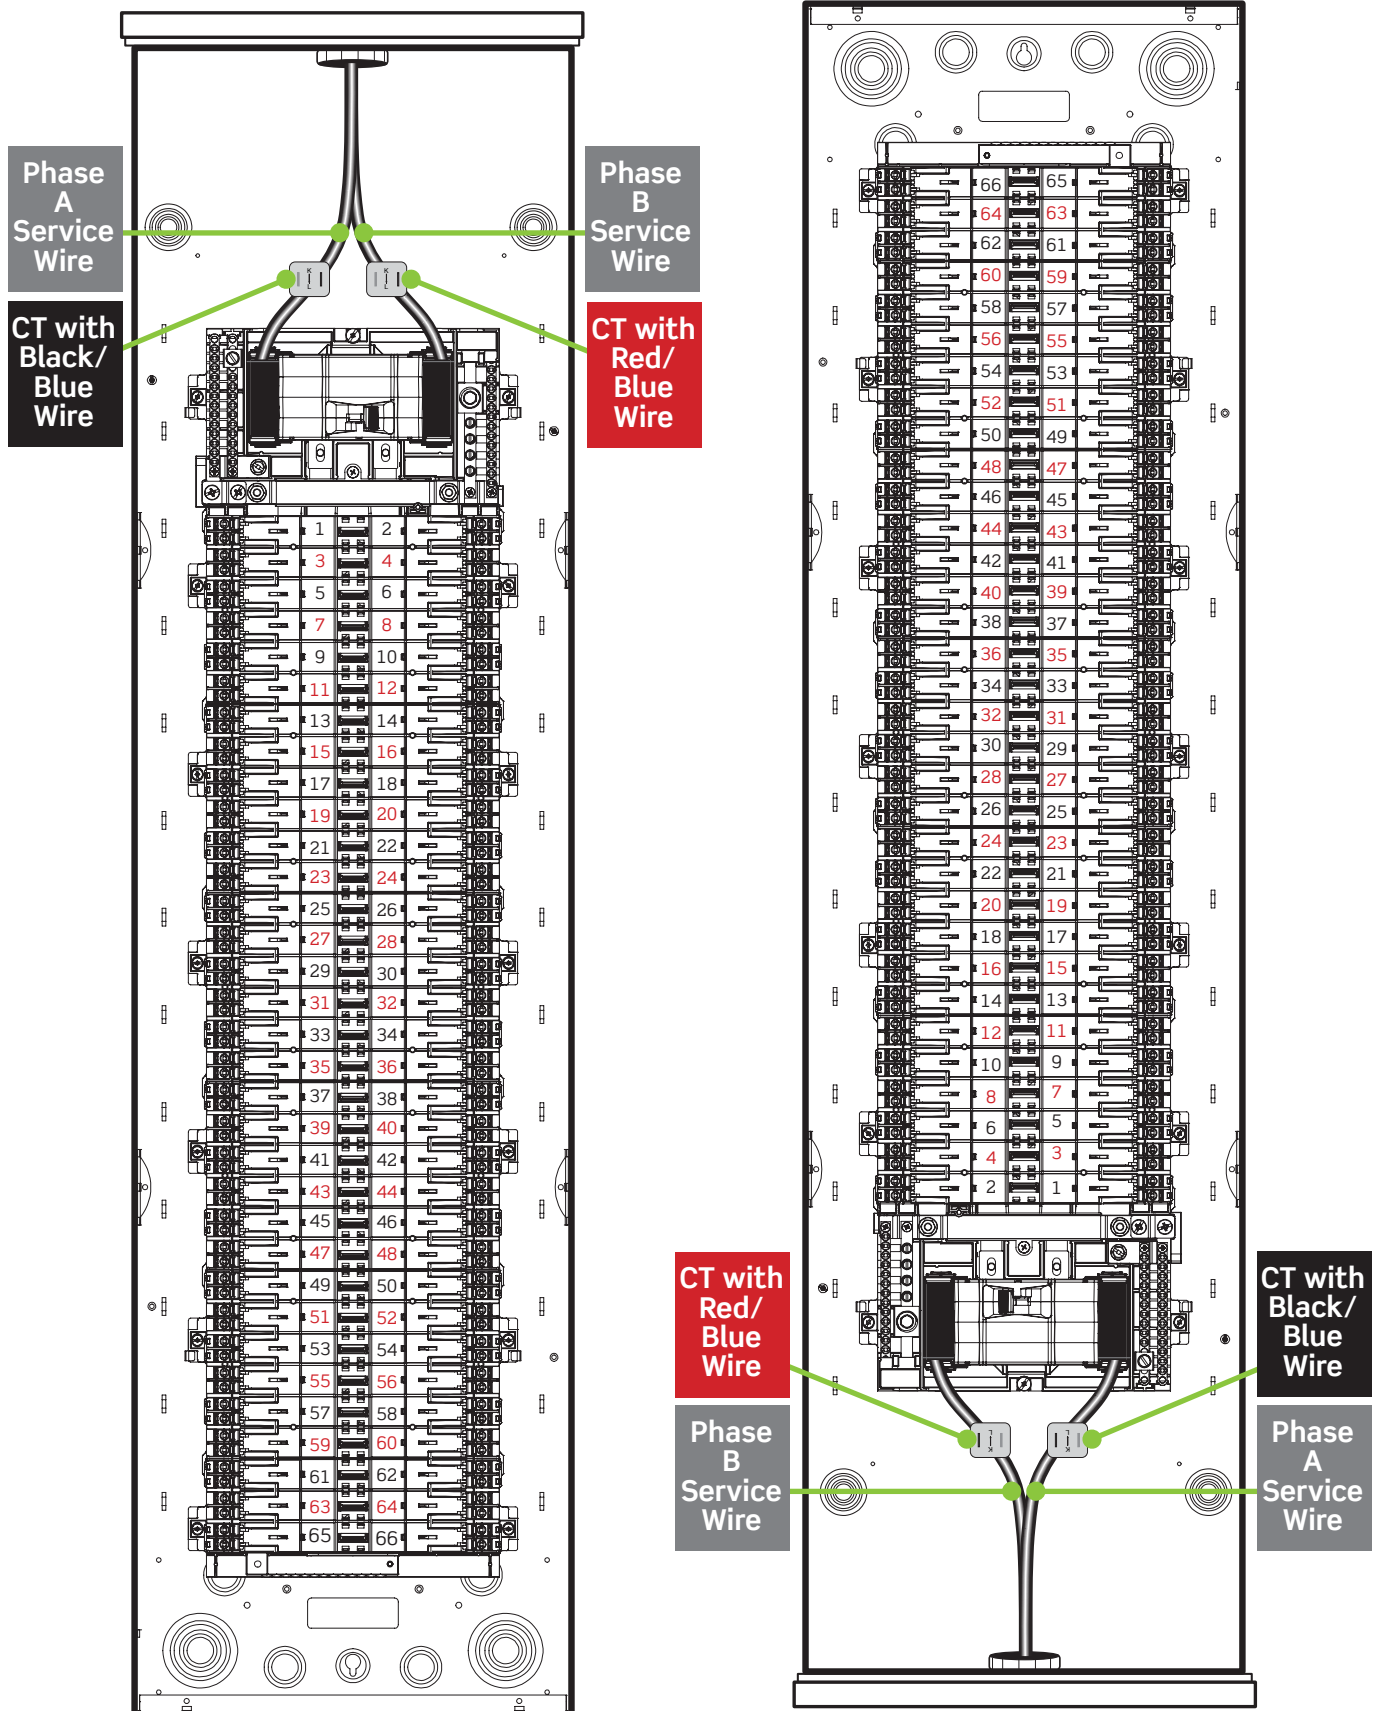

Phase Maps

The Phase Map illustrations are intended to simplify the installation process of your new Leviton Whole Home Energy Monitor (LWHEM), identifying where the device's power wires should be terminated depending on the location of the 2-pole device you will be using to supply power. The map also provides locations to mount your Smart Mains Metering Accessory CTs (LSMMA) to monitor whole-home energy consumption.

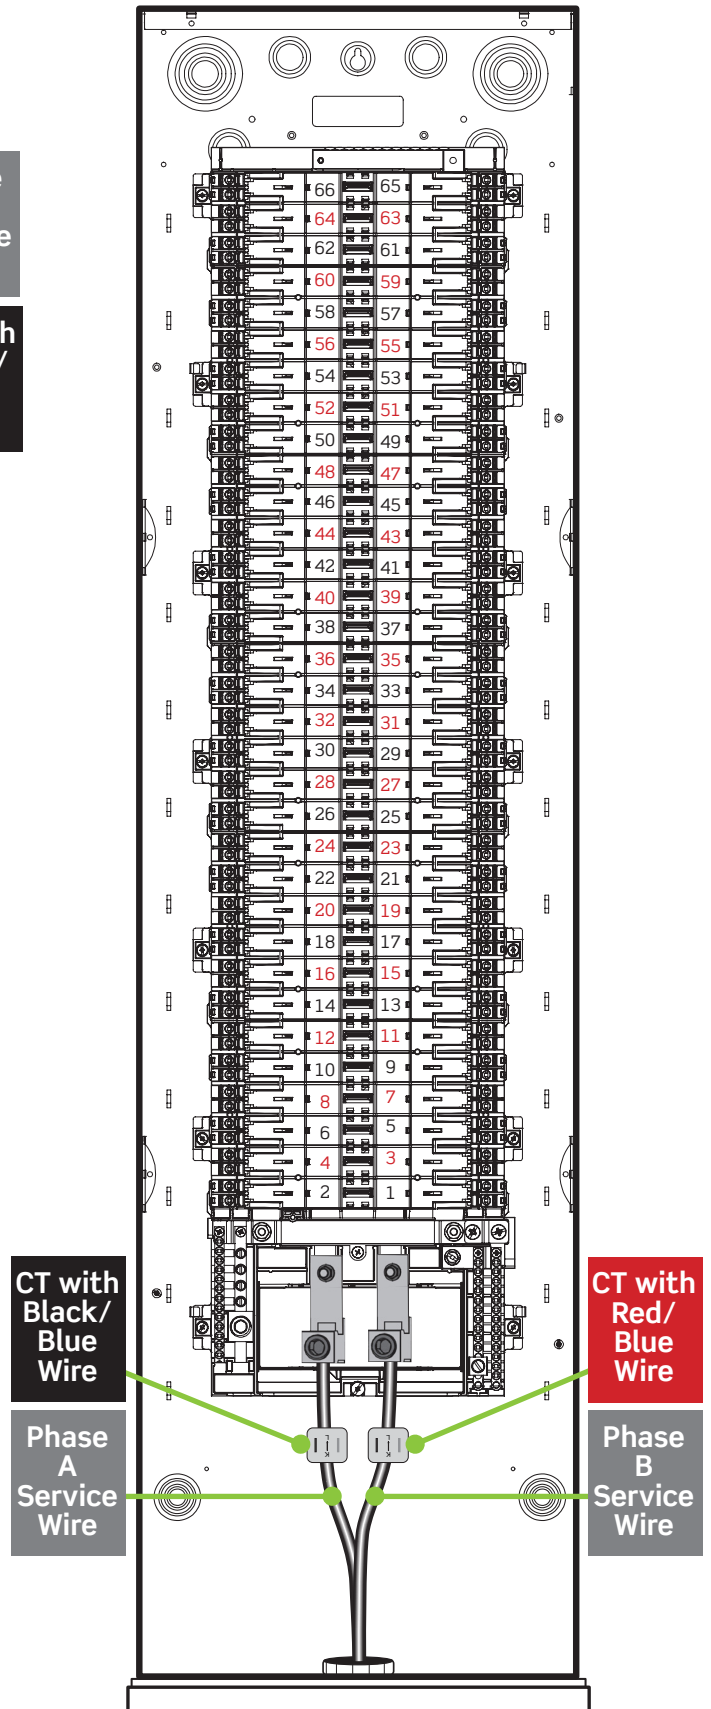

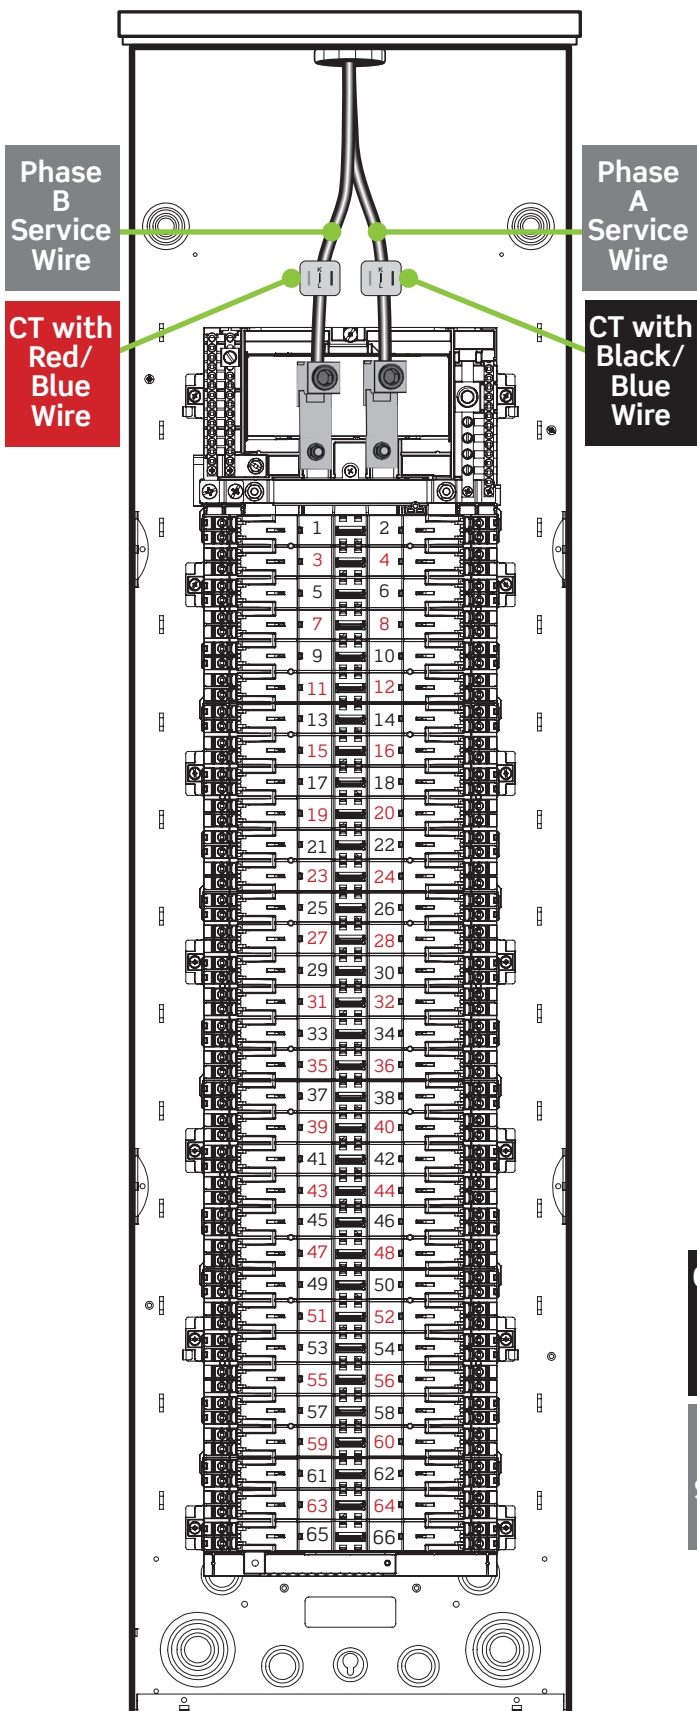

**The circuit breaker positions labeled in the illustrations are colored in accordance with the correct power wire from the Whole Home Energy Monitor for that breaker position*

Installation in a Main Breaker Load Center
