

# INSTALLATION INSTRUCTIONS

## SBP-302F

Ceiling Tile Support Plate with 12.85" diameter hole and optional 7.20" diameter hole for Hanwha products.

### Supplied Parts

- A. Support Plate with 12.85" diameter hole
- B. Adapter Plate with 7.20" diameter hole
- C. Wing Nut (2)
- D. Tether—Camera to Support Plate
- E. Tether—Support Plate to Structural Steel

### STEP 1

Break off the shipping protection tabs on each side of the ceiling tile support plate. Flex each tab up and down until the tab breaks free.

### STEP 2

Place the ceiling tile support plate on the ceiling tile, being sure that the support ears are straddling the t-bars.

### STEP 3

Mark the desired hole diameter.  
Temporary remove the ceiling tile.  
Cut the ceiling tile hole.  
Replace the ceiling tile.  
Place the ceiling tile support plate onto the ceiling tile.
