SecureGuard®
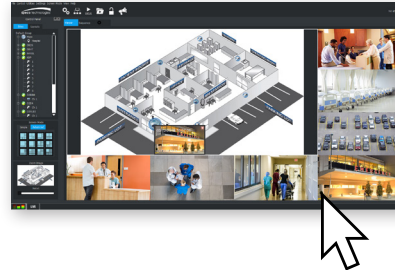

Video Management Software **Products & Services**

SecureGuard®

VIDEO MANAGEMENT SOFTWARE

User-Friendly • Easy Setup & Installation • Fully Scalable • No Licensing Fees • Free Software Upgrades

GENERAL

- Available as a standalone or client-server application
- Live View, record and review Speco IP cameras, NVRs and DVRs
- View up to 64 cameras in a single client instance
- Store an unlimited number of IP Cameras, NVRs, Hybrid Units, and DVRs
- Ability to "star" a site of interest
- Create unlimited number of users and authority roles
- Limit which devices and channels a user can view and playback
- Scan and locate Speco cameras on LAN for easy setup
- Archive to NAS, DAS, Amazon AWS for expanded storage
- Dewarp 360° panoramic lenses
- 2-Way Audio Communication[1]
- Dual stream support for IP Cameras, NVRs, and DVRs
- Send email notification when an event triggers a recording
- Brand SecureGuard® with your company logo[2]
- Archive recorded footage to a NAS/DAS on a scheduled/manual basis
- Automated check and download of software updates
- Backup system database on a scheduled or manual basis
- Save on storage and bandwidth with H.265
- Map your sites and channels to an uploaded image of your installation
- Send out emergency SMS notification
- Supports ONVIF Profile S cameras[3]

E-maps:

Import a bird's eye view image of your installation to map your sites and channels according to their location. Authorized users will be able to drag the map onto the client layout. Mapped sites and channels will react to connection status and local recording events (motion and sensor).
Dewarping:

SecureGuard® has the ability to dewarp 360° panoramic lenses and offers various viewing methods to the user for live view and playback.

Schedule Recordings:

Sites can be set for automatic recording when utilizing SecureGuard®. Users can create multiple schedules and customize as necessary utilizing Continuous, Motion or Sensor recording.

EZ Search:

This powerful time-saving tool within SecureGuard® allows users to search an event that occurred by helping find the exact time to begin Playback. Users can narrow down searches to (24) 1 hr clips and then drill even deeper to (24) 2.5 minute clips.

Watermark Exported Clips:

When exporting an archived video, users can add an overlayed image to their video in one of the four corners of the video frame. This creates an additional level of security, showing the video hasn't been tampered with.

2-Way Audio:

Send audio to a single or multiple devices (NVRs, DVRs, IP Cameras), with the option of recording the audio as well. Transmission methods include: Push-To-Talk or sending a pre-recorded paging (audio) file.

Send to a single device   Send to multiple devices

Audio Streaming:

Continuously stream audio to edge devices (such as music). Push-To-Talk & Paging File 2-way audio features overrides streaming audio (streaming audio resumes once PTT/Paging File session ends).

RECORDING, PLAYBACK & EXPORT

- Schedule Motion, Continuous, or Sensor recordings
- Playback scheduled and edge recordings
- Playback Slider Bar available for scheduled recordings
- EZ Search available for scheduled and edge recordings[1]
- Event List Search available for scheduled and edge recordings[1]
- Timeline Search available for scheduled and edge recordings[1]
- Export scheduled or edge recordings in .avi, .mkv, or .mov format
- Include SecureGuard® Player with exported video
- Watermark on video export
- Batch export video clips from Local/Server Event List

LIVE VIEWING

- Multiple screen layouts available for viewing
- Save your favorite screen layouts
- PTZ Control though the DVR, NVR, as well as PTZ camera
- Customize on-screen image quality
- Take quick snapshots of site(s) in an instance
- Trigger manual recording of site(s) with a click of a button
- Listen to and record audio from IP Cameras, NVRs, and DVRs[1]
- Audio Streaming[1]
- Send audio to sites using push-to-talk or by sending a pre-loaded audio file
- View created e-maps of installations that react to recording events and the connection status of sites and channels
- Be alerted by audio when an event occurs
- Create multiple tabs within a single client

Be ANYWHERE at ANYTIME.

SecureGuard® Apps

SecureGuard® Client • SecureGuard® Streamer

SecureGuard® Client App

SecureGuard® client app is a companion viewing app that allows you to connect and view sites from your SecureGuard® installation on the go. Download the app on your Android™ and iPhone® devices FREE.

- Add multiple SecureGuard® Server or All-in-One installations using an IP address or DDNS

- Connect using your SecureGuard® login ID

- Create an unlimited number of custom layouts consisting of different sites and specific channels

- View your sites along with the ability to listen to their audio

- Includes a help section with FAQ and contact information for our tech support team

Available on the App Store   ANDROID APP ON Google play
SecureGuard® Streamer

Secure Guard Streamer

Download SecureGuard® Streamer app and stream what is on your iPhone live while recording to SecureGuard® on either a PC or Server for real-time surveillance with a WiFi or 4G connection. SecureGuard® Streamer is an inexpensive solution that adds an extra, portable aspect to any surveillance system, providing complete coverage virtually anywhere.

Purchase in the App Store today!

Turn Your Smartphone Into An IP Camera/ Point-of-View Body Cam!

- Stream live and record real-time surveillance video to a SecureGuard® Server
- Works over 4G or WiFi connection
- Capture only the footage that's needed by starting and stopping the stream at any time
- Perfect solution for first responders, security guards, and any other scenario where on the go, direct first-person video is essential

SecureGuard® Servers

Become a Surveillance Powerhouse.

We've simplified the surveillance management process by pre-loading our dynamic VMS on all SecureGuard® Servers, which means easy setup, reliability, and complete security.

- With SecureGuard® VMS, multiple users can view and playback video from the server and the sites from anywhere in the world
- Fully scalable to meet the growing demands of your business' surveillance needs
- Free software updates will keep you up-to-date with Speco's latest technological advancements and will keep your system performing optimally at **NO ADDITIONAL COST**
