

T2856 Open Frame Transformer

Specification Chart:

Model #	Input (Primary)	Output (Secondary)
T2856	115VAC, 50/60Hz, 0.5A	28VAC/56VA (2.0A)

Installation Instructions:

1. Mount transformer in desired location/enclosure (*refer to Transformer Drawing and Dimensions below*).
2. Connect AC power 115VAC, 50/60Hz to primary leads (black and white) from terminal numbers 2 and 4 (*refer to Wiring Configuration below*).
3. Measure output voltage across the secondary leads (yellow and blue) from terminal numbers 6 and 10 (*refer to Wiring Configuration below*) before connecting devices. This helps avoiding potential damage.
4. Connect 28VAC device to be powered to the secondary leads (yellow and blue) from terminal numbers 6 and 10 (*refer to Wiring Configuration below*).

WARNING: This installation should be made by qualified service personnel and should conform to the National Electrical Code and all local codes.
