Installation Instructions:

Wiring methods shall be in accordance with the National Electrical Code/NFPA 70/ANSI, and with all local codes and authorities having jurisdiction. Product is intended for indoor use only.

- Remove backplane from enclosure. Do not discard hardware.
If your application requires a raised backplane, re-mount it using metal spacers and screws (provided).
- Mark and predrill holes in the wall to line up with the top three keyholes in the enclosure. Install two/three upper fasteners and screws in the wall with the screw heads protruding. Place the enclosure's upper keyholes over the two/three upper screws; level and secure. Mark the position of the lower two/three holes. Remove the enclosure. Drill the lower holes and install the fasteners. Place the enclosure's upper keyholes over the upper screws. Install the lower screws and make sure to tighten all screws.
- Mount included UL Listed tamper switch(es) (Altronix Model TS112 or equivalent) in desired location, opposite hinge. Slide the tamper switch bracket onto the edge of the enclosure approximately 2" from the right side (*Fig. 1, pg. 2*). Connect tamper switch wiring to the Access Control Panel input or the appropriate UL Listed reporting device. To activate alarm signal open the door of the enclosure.
- Mount CDVI A22K/A22NB/ADH10 boards to backplane, *refer to pages 3-4*.
- Refer to the *eFlow Power Supply/Charger Installation Guide* (eFlow6NB, eFlow102NB, eFlow104NB) and corresponding *Sub-Assembly Installation Guide* (LINQ2, ACM4, ACM8, PD8UL, MOM5) for further installation instructions.
