

Ground Loop Isolator for TVI Cameras

TVIGL

Features

- **IMPORTANT:** The TVIGL does not support UTC function.
Please make any adjustments between camera and recorder prior to installation of the TVIGL.
UTC commands **WILL NOT** work after this has been installed.
- Prevents video-signal distortion caused by video ground loops
- Prevents power cables from interfering with the HD camera signal.
- Eliminates picture tearing, cross-talk and rolling.
- Passive, no power required.
- Supports resolutions up to 4K.
- Maximum distance: 656' (200M)

Specifications

Frequency Response	25Hz ~ 50MHz (0~3dB)
Coaxial Input/Output Resistance	75Ohms
Ground Isolation	> 90dB @ > 50Hz
Isolation Voltage	500VAC/600VDC
Isolation Resistance	> 1M Ohm
CMRR	> 60dB
Dimensions	2.9" x 1.1" x 1" with 6" x 2 Cable
Weight	0.188lbs
