

## VIDDVR – Coaxial Balun for Standard Definition DVRs

Speco Technologies' VIDDVR is a coaxial balun that also reduces or removes interference caused by impedance mismatches from data signals, other video signals, nearby power, ringing telephones, fluorescent lights, transformers, and other sources.

### Features:

- BNC male to BNC female balun with 9.5" cables on each side.
- Gives your Standard Definition DVR immunity from interference.
- Built-in highly balanced mode of video transmission which is immune to interference from multiple causes.
- No power required.

### Installation View:

If you experience interference issues, first try installing the VIDDVR on the video reception side (that closest to DVR or Monitor). If that does not eliminate the interference, add a second VIDDVR closer to the camera side.

### Specifications:

ITEM NO.	VIDDVR
Transmission Distance	
Temperature	Operation: 14° to 113°F, Storage: -22° to 140°F, Humidity: up to 95%
Dimensions	2.9" W x 1.1" H x 0.8" D with two 9.5" cables
Weight	0.3 Lbs.

RoHS CE FC
